Hello Calvin,  
Regarding Gill's Ranch Well, please contact Matt Densmore of our CGS copied in this email.

Please let me know if you have more questions.

Thanks.

Best regards,

Hi Vincent,

Hope you are doing well. CES has questions about the records for Gill Ranch wells available on CalGEM's well search engine (see email below). Can you please provide a point of contact within CalGEM that CES can discuss their questions with.

Thanks,  
Calvin

**Subject:** Information Request\_Publicly available well records\_Gill Ranch Gas Storage

Hi Calvin,

As you know, CES and our project partners have been working on the subsidence concern raised by EPA in the latest Technical Feedback letter. The letter references the nearby Gill Ranch Field and some of the resulting impacts and operation considerations of that site.

We believe the design and operating experience associated with the Gill Ranch wells could provide key insights into how the risks of shallow compression (assumed from continual compacting of regional aquifers) can be successfully addressed for the Mendota Project.

We have been doing quite a bit of research and some of the information lodged by Gill Ranch Storage - operated by Gill Ranch Storage LLC - with CalGEM has been found to be available via CalGEM's Well Records search engine. It's apparent, however, that not all records for Gill Ranch wells are available on this system. It is our understanding that information on all wells should be available through CalGEM resources.

Do you know if there is an alternative method for accessing such records? Or could you put us in contact with the correct person(s) at CalGEM, who may be able to assist us locating this information? If necessary, we can have a representatives review the well records on location at CalGEM – assuming this is an acceptable practice.

Your guidance on the best path forward would be appreciated.

Thanks for your time and I look forward to hearing from you.

Best Regards,  
-Rebecca

**Subject:** RE: Class VI UIC Submission: Information Request

Hi Rebecca,

We are reviewing CES's Response #5 and looking forward to a call with CES and others regarding the subsidence issue.

Best regards,

Calvin
